spasm, inflammation and edema of the larynx, spasm, inflammation and edema of the bronchi, pneumonitis, pulmonary edema, burning sensation, Cough, wheezing, laryngitis, Shortness of breath, Headache, Nausea, Vomiting, Literature indicates that lectin from mistletoe is a cytotoxin very similar to ricin, abrin, and modeccin. In the absence of inhalation data, we are citing data published from the castor bean lectin which indicates that it is extremely toxic if inhaled as fine particles. Injection of a few micrograms into the bloodstream is fatal to animals. Therefore we consider the compound to be extremely dangerous. There is also evidence that these products should be considered strong sensitizers which may cause serious allergic reactions. Other dangerous properties can not be excluded.

Handle in accordance with good industrial hygiene and safety practice.
