

TraceCERT® Pesticide CRMs

For accredited testing labs, the availability of reliable certified reference materials (CRMs) is crucial for calibration and validation in compliance with ISO/IEC 17025. High-performance quantitative NMR (HP-qNMR) is applied for the certification of our *TraceCERT®* pesticide reference materials as a relative primary method to achieve traceability to the SI unit via NIST SRMs (Standard Reference Materials).

Our comprehensive portfolio of *TraceCERT®* reference materials offer the following characteristics:

- Certified content by quantitative NMR (qNMR)
- Manufactured under ISO/IEC 17025 and ISO 17034 double accreditation
- Highest level of accuracy, calculated uncertainties, lot-specific values and traceability
- Comprehensive documentation delivered with the product according to ISO Guide 31
