

## Product Information

**SILu™MAb Pembrolizumab - Stable Isotope Labeled Monoclonal Antibody Standard**  
 recombinant, expressed in CHO cells

Catalog Number **MSQC25**  
 Storage Temperature **-20 °C**

### Product Description

SILu™MAb Pembrolizumab is a recombinant, stable isotope-labeled, monoclonal antibody which incorporates [<sup>13</sup>C<sub>6</sub>, <sup>15</sup>N<sub>4</sub>]-Arginine and [<sup>13</sup>C<sub>6</sub>, <sup>15</sup>N<sub>2</sub>]-Lysine. Expressed in CHO cells, SILu™MAb Pembrolizumab is designed to be used as an internal standard for analysis of Pembrolizumab in human serum.

Recommended surrogate peptide sequences are indicated in Table 1. Suggested MRM parameters are available for download in several formats on the product display page at [www.sigmaldrich.com](http://www.sigmaldrich.com).

Each vial of SILu™MAb Pembrolizumab contains 100 µg of the labeled antibody lyophilized from a solution of phosphate buffered saline. Vial content was determined by measuring A<sub>280</sub> and using an extinction coefficient (E<sup>0.1%</sup>) of 1.4.

### Precautions and Disclaimer

For R&D use only. Not for drug, household, or other uses. Please consult the Safety Data Sheet for information regarding hazards and safe handling practices.

### Preparation Instructions

SILu™MAb Pembrolizumab recovery is maximized when 0.1% formic acid is used for reconstitution of the lyophilized product. Reconstitution with other solvents may reduce recovery. Do not freeze after reconstitution.

- Briefly centrifuge the vial at 10,000 × g to collect the product at the bottom of the vial.
- Add 500 µL of ultrapure water containing 0.1% formic acid to the vial.
- Mix the contents by gently inverting the vial a minimum of 5 times.
- Allow the vial to stand at room temperature for at least 15 minutes and repeat mixing by inversion.

### Storage/Stability

Store the lyophilized product at **-20 °C**.
