

## Product Information

**Anti-Cytochrome c**  
antibody produced in chicken,  
affinity isolated antibody

Catalog Number **GW20076F**  
Formerly listed as GenWay Catalog Number 15-288-20076F,  
Cytochrome c Antibody.

Storage Temperature Store at  $-20^{\circ}\text{C}$

Synonyms: Cytochrome c

### Product Description

Electron carrier protein. The oxidized form of the cytochrome c heme group can accept an electron from the heme group of the cytochrome c1 subunit of cytochrome reductase. Cytochrome c then transfers this electron to the cytochrome oxidase complex. the final protein carrier in the mitochondrial electron-transport chain. Plays a role in apoptosis. Suppression of the anti-apoptotic members or activation of the pro-apoptotic members of the Bcl-2 family leads to altered mitochondrial membrane permeability resulting in release of cytochrome c into the cytosol. Binding of cytochrome c to Apaf-1 triggers the activation of caspase-9. which then accelerates apoptosis by activating other caspases.

NCBI Accession number: NP\_061820.1

Swiss Prot Accession number: P99999

Gene Information: Human .. CYCS (54205)

Immunogen: Recombinant protein Cytochrome c

Immunogen Sequence: GI # 11128019, sequence 1 - 104

The product is a clear, colorless solution in phosphate buffered saline, pH 7.2, containing 0.02% sodium azide.

Species Reactivity: Human

Tested Applications: WB

Recommended Dilutions: Recommended starting dilution for Western blot analysis is 1:500, for tissue or cell staining 1:200.

Note: Optimal concentrations and conditions for each application should be determined by the user.

### Precautions and Disclaimer

This product is for R&D use only, not for drug, household, or other uses. Due to the sodium azide content a material safety data sheet (MSDS) for this product has been sent to the attention of the safety officer of your institution. Please consult the Material Safety Data Sheet for information regarding hazards and safe handling practices.

### Storage/Stability

For continuous use, store at  $2-8^{\circ}\text{C}$  for up to one week. For extended storage, store in  $-20^{\circ}\text{C}$  freezer in working aliquots. Repeated freezing and thawing, or storage in "frostfree" freezers, is not recommended. If slight turbidity occurs upon prolonged storage, clarify the solution by centrifugation before use. Working dilution samples should be discarded if not used within 12 hours.
