

eData exchange

Embark on Your Digital Transformation Journey

eMERGE™ Program

Our standardized platform
for the exchange of data starting
with the electronic delivery
of raw material
quality data

The Advantages of Raw Material eData Exchange

Eliminate
errors &
save time

Reduce
process
variability

Improve
operational
& process
efficiencies

Enable next generation
biologics manufacturing
Predictive analytics & advanced
process monitoring and control

Compatible with your analytical data platforms including Bio4C™ ProcessPad real-time monitoring and reporting solution

*Compliant with ASTM E3077 – 17

- Standard Guide for Raw Material eData Transfer from Material Suppliers to Pharmaceutical & Biopharmaceutical Manufacturers
- Defines standard format and data content for ease of use & implementation with:
 - Consistency of files for different product types
 - Scalable and easily maintainable system covering complete product portfolio

The eMERGE™ Program Vision

A user-friendly digital experience including
analytical and logistical data, to ensure drug
manufacturing predictability and control.

Getting Started with eData

1

Start your digital
transformation
journey

3

Establish close
collaboration and trust
between suppliers &
manufacturers

7

Work together on future
technology roadmaps and
expansion objectives

2

Build a standard
platform solution for
flexibility & scalability

4

Involve multi-functional
subject matter experts

5

Open sharing of process
and application information
