Product Information

**Tissue Section Slide, Single Organ,
from rat brain**

Product Number **R 9651**

Store at Room Temperature

Product Description

This slide contains a single paraffin embedded section prepared from rat brain. The tissue section is fixed in paraformaldehyde after excision and then a section approximately 5 μ m thick is embedded in paraffin. The tissue slide is suitable for most immunohistochemistry applications and as an immunohistochemistry control slide. The slide may also be used for *in situ* hybridization and *in situ* PCR studies, including tissue specific protein and mRNA expression comparing the location of novel genes among different tissues.

Component

Slides containing tissues of single organs or single systems are available in sets of five slides.

Storage/Stability

It is recommended to store the slide at room temperature.

Precautions and Disclaimer

Consult the MSDS for information regarding hazards and safe handling practices.

LCM/MAM 7/02
