

## Information to the batch numbering System

The batch number consists usually of 1 or 2 letters and a 6-9 digits number. In some cases the date of filling is listed additionally. (For some special product groups different rules exist.) Due to the roll out of the new portfolio branding to Emprove® products, the label design might differ during the transition time as shown.

Letter/s: Indicating the production site

6-9 digits number:

4 to 7 digits as a running number for identification, the last two digits are identical with the last two digits of the product code number, e.g. here 60 (out of 1.00160)

**AB5432160**      **1.00160.1000**      **1 kg**

Lot
