

RABBIT ANTI-CASPASE 3 POLYCLONAL ANTIBODY

CATALOG NUMBER:	AB3640	QUANTITY:	100 µg
LOT NUMBER:		CONCENTRATION:	1 mg/mL
ALTERNATE NAMES:	CPP32	EPITOPE:	amino acids 104-117
BACKGROUND:	Caspase-3 (CPP32, Apopain) is the most extensively studied apoptotic protein. Caspase-3 is synthesized as an inactive proenzyme (~32-35 kDa) that is processed in cells undergoing apoptosis by self-proteolysis and/or cleavage by another upstream protease. The processed form of caspase-3 consists of large (17 kDa) and small (12 kDa) subunits which associate to form an active enzyme. The active caspase-3 proteolytically cleaves and activates other caspases, as well as relevant targets in the cells such as PARP and DFF.		
SPECIFICITY:	AB3640 recognizes aa 104-117 of human caspase 3; this region is within the p17 large subunit region. The antibody will detect both pro and large subunit forms of the protein, as well as partial processed intermediates in apoptotically induced cells.		
APPLICATIONS:	<u>Western blot:</u> 1:500 – 1:1000 <i>Optimal working dilutions must be determined by the end user.</i>		
SPECIES REACTIVITY:	Human and mouse. Reactivity with other species has not been confirmed.		
IMMUNOGEN:	Peptide corresponding to amino acids 104-117 of human Caspase 3		
PRESENTATION:	Affinity purified immunoglobulin liquid in PBS, pH 7.6, containing 0.1% sodium azide.		
STORAGE/HANDLING:	Maintain at 2°-8°C for up to twelve months from date of receipt.		

Important Note: *During shipment, small volumes of product will occasionally become entrapped in the seal of the product vial. For products with volumes of 200 µL or less, we recommend gently tapping the vial on a hard surface or briefly centrifuging the vial in a tabletop centrifuge to dislodge any liquid in the container's cap.*

FOR RESEARCH USE ONLY; NOT FOR USE IN DIAGNOSTIC
PROCEDURES. NOT FOR HUMAN OR ANIMAL CONSUMPTION

Unless otherwise stated in our catalog or other company documentation accompanying the product(s), our products are intended for research use only and are not to be used for any other purpose, which includes but is not limited to, unauthorized commercial uses, in vitro diagnostic uses, ex vivo or in vivo therapeutic uses or any type of consumption or application to humans or animals.
