THE DOZN"SCALE

Based on the 12 Principles of Green Chemistry*, DOZN helps researchers, scientists, and manufacturers increase performance and efficiency while reducing human and environmental impact.

*Paul T. Anastas and John C. Warner, 1991.

Puromycin dihydrochloride from Streptomyces alboniger (P7255)

12 Principles of Green Chemistry	Percentage of Improveme	nt	Results
Atom Economy	2%		Increased yield. Used less raw materials
Waste Prevention	N/A		
Reduce Derivatives	N/A		
Renewable Feedstocks Use	2%		Decreased amount of raw materials
Real-Time Pollution Prevention	N/A		
© Catalyst	N/A		
Energy Efficiency Design		94%	Reduced chemical processing
Less Hazardous Chemical Synthesis	N/A		
Safer Chemical Design	N/A		
Safer Solvents and Auxiliaries	N/A		
Design for Degradation	23%		Elimination of substance that degrades to environmentally hazardous materials
Inherently Safer Chemical for Accident Prevention	N/A
