pesign for sustainability (pfs) scorecard

With our DfS scorecard, we drive sustainability improvement during the product development process through multiple product sustainability criteria divided into seven impact areas.

Milli-Q® SQ 2Series Water Purification Systems: Milli-Q® SR 240, SR 240L and SR 240XL Production Stations*

Innovative simple and compact tap to pure water solution with less electricity and water consumption

Impact areas		Results
	MATERIALS	When the prefilter module is required, there is a 33% increase of the total mass of materials but there is a 20% reduction when the prefilter module is not is required
**	SUPPLIERS & MANUFACTURING	50% of the suppliers involved for the entire system participate in Together for Sustainability initiative with a valid assessment thanks to continuous efforts to assess and improve sustainability practices within our supply chain
(7)	PACKAGING	Systems and consumables corrugated packaging with 100% recycled content and sustainable forestry certification Protective inserts for the systems made of polyethylene (PE) foam with 50% recycled content
S 3	ENERGY & EMISSIONS	Significant increase of pure water production rate with at least 52% reduction of daily electricity consumption thanks to simplified design, minimized electronics, optimized stand-by mode, and a significant increase of pure water production rate
	WATER	60% less tap water consumption thanks to the intelligent reverse osmosis (RO) recovery loop. During manufacturing, innovative quality control process saves \sim 20 L per system
W.	USABILITY & INNOVATION	Designed for easy installation, use and maintenance by the customer thanks to clear color-coding of the components and associated instructions
	CIRCULAR ECONOMY	Designed to be easily maintained to maximize its lifetime and to be easily disassembled to facilitate end of life management
Baseline product: RiOs™ 3 Water Purification System		* The characteristics presented in this DfS scorecard visual are the ones of the entire system including the

production station, the cartridges and the optional Milli-Q® SP 240 prefilter module © 2023 Merck KGaA, Darmstadt, Germany and/or its affiliates. All Rights Reserved. The vibrant M, Milli-Q and RiOS are trademarks of Merck KGaA, Darmstadt, Germany or its affiliates.
