DenLine.com/Medical
DenLine.com/Dental

③ **User Comfort**
18 Cu. Ft./Min Average Air Permeability (ASTM D 737)

- Employee Comfort contributes to Employee Productivity, Compliance to OSHA

④ **Sanitizing Coats During Laundry Processing**

High Temperature Fabric Enables Coat to be Sanitized Per CDC/HICPAC Recommendations for Processing Medical Bloodborne Linen

⑤ **Autoclavable** (274°F/135°C)

⑥ **Static Control**

Surface Resistivity (Test Method 76) 10⁹

Static Decay (FTMS 4046-101 C) < 1.0 sec.

Important with Polyester Coats in Uncontrolled Humidity Environment(s).

- Prevents Static Discharge to Employee, Patient, & Damage to Computers and Computerized Instruments

⑦ **Construction**

Snap Closures: "Lifetime Guaranteed," Heavy Duty, Stainless Steel.

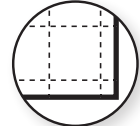

Cuffs: Durable, Spun Woven, "Low Pill" Polyester, Comfortable, "Quick Dry" if Wet, Stain Resistant Finish.

Vents at Hips: Increases Air Circulation to Upper Body. Minimizes Tendency to "Ride Up" when Seated.

Pockets: "No Failure" Stitching. Double Stitched, Bar Tack Reinforced Top Corners.

90° Corners at Pocket Bottom – Prevents "Punch Out" of Corners.

⑧ **Lint Free**

Tested Clean Room ISO 5 (Class 100) – Suitable for Use in Molecular Clean Rooms

⑨ **Appearance**

Stain Resistant – Repels Blood, Bleach and All Aqueous Reagents

NEW
